Ref.: Letter 28 September 79 frm Mr. P. Moore, PhD.

Dear people,

Thank you very much for your response-letter signed by Mr. Moore.
I had not awaited an answer that quick.

Thanks also for the reference given to your French office - a
letter is already underway. (By the way: I hope, Mr. Parmentier
has a German-French translator for our French is worse than our
English).

I would like to subscribe the Greenpeace Chronicles and become
one of your members. Therefore I enclose an International Money
Order (\$ 25.-) for subsription and postage of the next 12 issues.
If this should be too less for overseas-mail, please send me an
invoice - if it is too much, take the rest as a donation.

In any case I am going to give an article about this correspondence
into one of the next "BBU-Info's", our monthly appearing
environment-magazin which reaches all of the different groups.

With Mrs Moore I hope that this link will be maintained. Our group
too believes that we all have a responsibility not only as guardians
of the world but also as forerunner and an example worth imitating
for further generations referring to our environment.

And I think this is not only a question for a few idealists - it
seems to me to be significant to live, and to survive.

How can anyone dare to set children into the world - as it is?

So we have to take any chance to change this status quo.

I think the way we go is the best possible. What we need is more
emphasis and influence in Governmental decicions.

I'll give you notice when communications between your French office
and us are established.

With best wishes

Gerhard Dunkel
